

# HEAVY TOBACCO SALES; WEED STILL CLIMBING

Holiday Intervening Did Not Materially Cut Down the Receipts in Loose-Leaf Markets.

**RICHMOND'S INCREASED SALES**  
Leaf Higher Than Ever at Some Points—All Grades and All Colors in Demand at Steadily Growing Figures—Another "Season."

Notwithstanding the fact that Thanksgiving Day intervened and most of the leaf tobacco markets of Virginia and North Carolina cut the sales down to three beginning on Monday and closing down for the week on Wednesday, the receipts and sales were heavy, as the various reports below will show, and they will show further that the activity continues and prices paid for all grades continue to be on the high order and pleasing to the growers.

For the three business days of the week the sun-dried offerings on the Richmond market amounted to 250,000 pounds and these offerings found ready buyers whose bidding enabled the warehousemen to realize for their constituents the gratifying average of about \$14.50 per 100 pounds. There was considerable improvement in the figures paid for the commoner and lower grades, the decline of the previous week being about overcome. Wrappers and all other types of the higher grades sold as high as at any time this season, the top notch grades for wrappers being \$24 per 100.

The total of auction sales in Richmond for the month of November was 2,514,750 pounds, which brought an average of \$14.27 per 100. The sales for the months of October and November amounted to 2,779,440 pounds, which went for an average of \$14.06 per 100. The sales for the two first months of the season of 1915 were 530,355 pounds at the average price for the same was only \$6.98 per 100. This it will be seen that the increase in offerings for the two first months of this year, as compared with last year was 1,984,405 pounds and the average price was \$7.29 per 100, the average for this year being more than double that of last year. Truly this is the golden era for the growers of the sun-dried tobacco.

The Richmond warehousemen look for large deliveries this week. The sales will open on Monday when an accumulation of goods shipped by rail will be placed on the floors.

**Record Breaking at Bedford City.**  
BEDFORD CITY, VA., December 2.—The sales of leaf tobacco at both of the warehouses of Bedford City this season have been very large and the prices of all grades have been very satisfactory to the farmers. The condition of the roads and the favorable weather for handling the leaf have contributed to the larger receipts for this market. Prices for all types of leaf, including the top notch grades, are high and for the different types the figures paid have been the highest ever before known on this market. But few dark wrappers have shown up as yet, but some have sold as high as \$27 per 100.

**Heavy Sales at South Boston.**  
SOUTH BOSTON, VA., December 2.—Below is a summary of sales of leaf tobacco made on the South Boston market for the month of November, together with total amounts sold this season as compared with sales for a like period last year:

Sold in November, 1916, 1,553,193 pounds; average, \$19.77; total, \$30,699,499. Sold in November, 1915, 1,229,576 pounds; average, \$19.51; total, \$23,989,956. Gain for 1916, 323,617 pounds; average, \$22.25; total, \$7,709,543. Loss for 1915, 325,383 pounds; average, \$17.65; total, \$5,739,649. Sold in December 1, 1916, 1,967,222 pounds; average, \$17.65; total, \$34,668,949. Sold in December 1, 1915, 1,573,565 pounds; average, \$17.75; total, \$27,809,956. Gain for 1916, 393,657 pounds; average, \$22.50; total, \$8,858,993. Loss for 1915, 380,343 pounds; average, \$17.65; total, \$6,709,543.

Sales for the past week have been large, the total for the week being about 1,000,000 pounds. The market was closed on Thursday for Thanksgiving, but the market for the present day is very active. The market is above \$10. With reasonable weather at hand, heavy sales are expected for the coming week.

**Very Large Breaks in Danville.**  
DANVILLE, VA., December 2.—The sales of leaf tobacco have been large all the week except Thanksgiving Day, when there were no sales. There is

no change to note in the market. The farmers continue to bring their tobacco to market as rapidly as possible, and the buyers are just as eager to buy as at any time during the season, and are paying top prices for everything offered. There are very few low-grade tobaccos to be found in the market. These goods are scarcer and higher than in the past twenty-five years. There are many inquiries in the market for red-leafed tobaccos, but very few are available.

The loose sales on this market for the season to December 1 foot up 19,300,100 pounds, and the average is \$17.82. The monthly sales and average to date are as follows:  
August—318,556 pounds; average, \$10.72. September—2,879,927 pounds; average, \$13.44. October—9,963,518 pounds; average, \$17.12. November—7,002,299 pounds; average, \$19.88.

**Big Figures at Drakes Branch.**  
DRAKES BRANCH, VA., December 2.—The receipts of leaf tobacco this week were not quite as heavy as last, owing to one day's holiday. The sales amounted to about 300,000 pounds and prices were the highest of the season, the average for everything sold in darks being \$10.15 per 100 pounds. Some of the wrappers showed up, and they sold for from \$25 to \$11 per 100 pounds. One farmer, E. T. Elder, sold a load that averaged \$22.50 per 100, his prices being, for lugs, \$11.50; short leaf, \$12.75; wrappers, \$30.40 and \$31. Heavy sales between now and Christmas are looked for.

**Satisfactory Prices at Petersburg.**  
PETERSBURG, VA., December 2.—There were few sales of both bright and dark tobacco this week and at highly satisfactory prices. Prices for bright ranged from \$10 to \$15, with an average of \$13.50 per 100 pounds. Prices for dark tobacco ranged from \$8.50 to \$15, with an average of \$9.96 per 100 pounds. A good many lots of dark wrappers sold at \$25, \$30, \$35, \$38, \$40, \$42 and \$45. The last named price was the highest on record in the State for the same class of goods.

**Advancing Prices in Blackstone.**  
BLACKSTONE, VA., December 2.—The sales of leaf tobacco this week in this market this week amounted to 235,970 pounds, brights 8,064 pounds. The sales of all grades up to November 20 were 1,654,832 pounds. Sales of same period last year were 716,211 pounds. Prices, \$17.272 pounds. There has been a decided advance in prices on all grades this week, lugs going up about \$5. 145,432 pounds. The better grades from \$1.50 to \$2 per 100. Heavy sales are looked for next week.

**Farmville Makes Big Gain.**  
FARMVILLE, VA., December 2.—The sales of leaf tobacco have not been very heavy on this market this week, as most of the tobacco which was taken down in the last "season" has been sold. Offerings for the week amounted to 224,448 pounds. The market was active, and all grades sold well up, lugs bringing as high as \$16, short leaf as much as \$12, long leaf \$15, and wrappers at the way from \$15 to \$25 per 100. The total sales of this week for this year foot up 1,875,753 pounds against 915,915 pounds for the same period of 1915, being a gain for this year of 959,838 pounds.

**Higher Than Ever at Lynchburg.**  
LYNCHBURG, VA., December 2.—On account of Thanksgiving Day the leaf tobacco sales were lighter this week than otherwise would have been the case, the total being only 235,000 pounds. The sales from September to December 1 amounted to 4,455,900 pounds. Sales for the same period of last year were 4,420,000 pounds. Prices were stronger this week than they have been at all, and the general average price for the week was the highest of the season.

Common grades of tobacco are still bringing unheard-of prices, with all other grades bringing remarkably good prices. The demand for wrappers is greater than for a long while, some selling as high as \$40 per 100 pounds. Sweet air-cured, as well as all dapple grades, are selling very high.

**Pretty Prices at Rocky Mount.**  
ROCKY MOUNT, N. C., December 2.—Receipts for the three sales days were fairly good, amounting to 500,000 pounds, at an average of \$22.88, making a total for the season to date of 13,750,000 pounds, at an average of \$22.72.

Offerings have not differed materially from recent weeks, except more common, nondescript tobacco has appeared, indicating the near approach to the end of the season.

Prices have been well maintained, and in some instances show an advance over previous weeks, though quotations would not be notably higher as a whole.

About 80 to 85 per cent of the crop has been sold, and with the good season prevailing and the consequent good receipts, the crop will be nearly all sold before the holidays.

# DEMONSTRATION HERD AT GREAT POLYTECHNIC

Layout That Teaches Dairying and Makes Money as It Goes Along. Most Careful Breeding.

**FAMOUS SIRE LOANED SCHOOL.**  
Facts About Virginia Polytechnic Herd That Every Dairyman and Farmer in State Ought to Know. The Best None Too Good.

BLACKSBURG, VA., December 2.—The Virginia Polytechnic Institute proposes to make good in the correct demonstration of cattle raising for dairy purposes. Its officers and managers are always on the alert for the best that is to be had in all things pertaining to this great industry. Arrangements have just been made by which Mansfield-Hall Farm donates the services of the famous herd bull, Mona Rose's Glory, No. 62,251, to the institute for a period of two years. This bull is wonderfully well bred, being sired by Eminence's Gold-Mont-Lad, one of the most famous prize-winning bulls of his time, and out of Mona Rose, with Register of Merit record of 6,490 pounds of milk in 310 days, the latter containing 41 pounds of butter. Mona Rose's Glory has been one of the most successful show bulls in Virginia for a number of years, as will be seen from his winnings: In 1910, State Fair, first in reserved championship, age eleven months; 1912, Virginia State Fair, first in reserved championship; 1913, first premium; 1914, first premium; also champion at Fredericksburg Jersey Show, 1915, in cattle at State Fair, but was first in championship at the Roanoke, Lynchburg and Fredericksburg shows; 1916, first in championship at Fredericksburg Dairy Show.

**THE KIND THAT MAKES THE GREATEST MILKERS.**  
Aside from being a good individual, this bull is also a good producer, in that he has five daughters in Register of Merit, Class AA, two daughters on retest at the age of four years that will make over 600 pounds each, and four more daughters on test at the present time that are making wonderfully good records. The Virginia Polytechnic Institute believes that Mona Rose's Glory will make an exceptionally good cross with the Jerseys at present in the herd, and that he will improve the stock already on hand. This is saying a good deal, because the herd has reached the standard where all of the cows, barring none, which have finished first lactation period, have Register of Merit records. All young heifers with first calf are being tested for Register of Merit records, and indications are that all will make the requirements.

**FACTS CONCERNING THE DAIRY STOCK OF V. P. I.**  
All Jersey cows in the herd that have finished one lactation period have qualified for Register of Merit records. These records were all made as immature cows of the following ages: three two-year-olds, one three-year-old and three four-year-olds. The average milk production for the year, Register of Merit records, 6,916 pounds. Average butter production, 454 pounds of 57 per cent butter.

In the Holstein-Friesian herd there are fourteen cows that have finished one lactation period, and all of them, with the exception of two, Dione DeKol and Buckeye DeKol Pauline second, have records as two-year-olds. It is needless to say that if these cows had been tested as two-year-olds they would have tended to increase the average rather than decreased it, as Dione DeKol has a record of 956 1/2 pounds of butter as an eight-year-old. During this lactation period she was on the short-crop, and Buckeye DeKol Pauline second has a record of 1,159.52 pounds of butter in one year, which is a world's record for cows owned by colleges and experiment stations. The twelve two-year-olds have an average record of over 550 pounds.

Dr. J. C. Bran, resident physician at the Baptist Hospital, St. Louis, says that spinal curvature and displacements are occurring in all ranks of life with alarming frequency, that they are caused by all manner of injuries, improper positions at desks, counters and work benches; that some may consist of only a slight twist or contraction of the spine, or of a nerve may be pressed in such a manner as to half paralyze or weaken a vital organ, etc.

Dr. W. H. Humphrey, Health Commissioner of the city of St. Louis, says that 80 per cent of the population are afflicted with some form of spinal defect, that it is the cause of so much nervousness, indigestion, headache, rheumatism, mental weakness, and many other grave and dangerous diseases, and is the genuine preparer of the soil for organic disease.

G. H. Patchen, R. S. M. D., New York, says: "The greatest medical discoveries of this or any previous age are the facts that the physical cause of

disease is, with few exceptions, due to some form of spinal displacement, and second, that this cause can be removed by one or more Chiropractic adjustments requiring less than half a minute."

Chiropractic removes the cause of disease more promptly, radically and permanently than any other known method.

**The Evidence of Wonderful Results From Dr. Creasy's Chiropractic Adjustments.**

Little Gertrude Farmer, four years old, of 1021 Hull Street, had infantile paralysis when one year old and before she had learned to walk, and for three years she had been unable to stand. After treatment by various methods with no improvement, Dr. Creasy was asked to take the case last May. After three treatments she could stand on her feet for the first time in her life, in several weeks she was walking without assistance. Since it became known that Gertrude could walk, many people have called to see her and her mother and talk with her mother about the cause of the trouble, and the use of the limb was restored. The treatment never caused Gertrude any pain or discomfort.

The following are a few of the cases from all out of the city Dr. Creasy has successfully cured, cured being effected without medicine or drugs through Chiropractic Spinal Adjustments: Asthma, appendicitis, bronchitis, both acute and chronic, catarrh of nose and throat, goitre, gall stones, heart disease, mental troubles, lumbago, neuralgia, neuritis, paralysis, rheumatism, sciatica, St. Vitus's dance, and other female troubles, rheumatism, sciatica, St. Vitus's dance, and other female troubles, rheumatism, sciatica, St. Vitus's dance, and other female troubles.

LADY PATIENTS—In no line of disease do we have better success than in the various diseases of the spine, which affects womankind. Benefits are promptly shown without the annoyance which they are subjected to under other treatment. The proper nerve supply being restored, normal functions are quickly re-established.

of butter in a year. Six two-year-olds have average records of 600 pounds of butter per year, including the whole herd, with records of three mature cows, ten immature cows, including eight two-year-old records, the average production of the Holstein-Friesian herd of V. P. I. is 18,700 pounds of butter. Five of these cows have an average yearly record of 932 pounds of butter.

**INAUGURATED AS PRESIDENT**  
Rev. C. Brown Cox Inducted into Office Tuesday as Head of Marion College.

[Special to The Times-Dispatch.]  
PULASKI, Va., December 2.—Rev. C. Brown Cox was inaugurated as president of Marion College, Marion, Va., on Tuesday. The presentation address delivered by Rev. J. B. Greiner, president of the board, the charter and keys were delivered by E. K. Cox, secretary of the board. The new president was extended by Rev. H. N. Miller, D. D., retiring president, James W. Sheffield, representing the board; Mrs. E. H. Copenhaver, of the alumnae; Miss Ruby Miller, for the student body, and Rev. J. L. Seiber, president of the Southwest Virginia Synod of the Lutheran Church.

**Abingdon's New Company.**  
ABINGDON, VA., December 2.—The Abingdon Utilities Company has taken over the electric property and business of the Abingdon Water and Electric plant, and will proceed, after the holidays, to improve and enlarge the power and steam plants, although the exact plans have not yet been decided upon. The Utilities Company has \$100,000 paid-up capital stock.

# HOW DID THAT TURKEY SET ON YOUR STOMACH?

## GIVE TANLAC A THOROUGH TRIAL

Don't Expect the Impossible Even From Tanlac—Give It a Fair Chance.

**THOROUGH TEST WINS.**

This ad-writing job is no cinch. Here I sit writing folks a letter every few minutes, telling them what neighbors are saying and trying to get their health back, and you don't answer me back, give me any reason for not rushing to the nearest Tanlac store, and you don't even deign to reply. It is no cinch writing would after day to the same people and never getting a reply. I could smash any argument you've a mind to put up, but you won't put it up. There is nobody on earth as well-read on the subject of Tanlac and what it will do for you as I am. I can cite a thousand cases in proof of every argument I give you. Here's one line bit of proof—you can investigate for yourself if you want to. Mrs. Height, a Richmond lady, said: "I was a nervous wreck—so nervous I couldn't do my housework and at night couldn't sleep. Whenever I would doze off I would wake with a start, all nervous and excited. Friends who had been helped by Tanlac urged me to try it, and it has entirely relieved me. I feel well and strong again, work is a pleasure around the house, and I've two reasons now for recommending Tanlac: first, because I feel grateful for the wonderful good it did me, and secondly, because I want to help others that may suffer in like manner. I cannot say too much for this great nerve tonic," declared Mrs. L. J. Height, 4011 Lawson Street, Richmond.

I can't say enough about Tanlac, either—nobody can. Do you know that for over a year we've been publishing the statements of Richmond folks for the purpose of convincing you Tanlac is worth a thorough trial? That's a fact. Anybody who says "Tanlac doesn't do the work" hasn't tried it. Of course, some folks, after taking one bottle, or even two, have given up when they should have remembered how long a doctor would have taken to treat them, but they don't need medicine so much as they need sense. Folks that won't give a good thing a fair trial are hopeless.

**INDIGESTION TROUBLES ALL REAL PROOF VS. HOT AIR**

Folks Troubled With Indigestion and the Ills That Follow Ought to Read This.

**TALKS BRASS TACKS.**

Here's a statement from a Richmond lady that ought to convince anybody that Tanlac is worthy a trial, provided they are troubled with nervous indigestion and all the ill effects that come from indigestion. And by the way, it would take a book to list the ill effects that come from indigestion. There's those full bellies that are nervous, and then there's that heavy, depressed, bloated, gassy feeling after meals. Pains in the pit of stomach, pressure in chest and all around the heart and sides. Then we often have belching, spitting up food, stomach gets sour and all. Those are only a few of the troubles folks with indigestion are forced to contend with. Here's what Mrs. Mitchell, 1257 Taylor Street, Richmond, says:

"I was suffering from nervous indigestion and about all the ill effects that come from indigestion. I was troubled all the time with a fullness in the region of my heart. At times this was very painful, too, and I could scarcely get my breath, but since taking Tanlac, which I did at the suggestion of friends, I have been greatly relieved. Before I had finished the first bottle I noticed an improvement in my health, and especially in my digestion, and I find since taking two bottles that it will do everything it is advertised to do. It is a great tonic and system builder, and I cannot praise this Master Medicine too highly. I want every body that needs a tonic and indigestion remedy to take Tanlac." Signed Mrs. S. A. Mitchell.

Go, write to me and tell me how Tanlac does this, how it works in such a truly wonderful manner in cases like this, but what is the use. What the world wants and what you want is results. Theory doesn't count, it's your money or mine. We want proof. That's why I've been publishing testimonials of Richmond people in this paper for over a year. Try Tanlac yourself—Adv.

## Maybe You Didn't Eat Turkey—Some Never Will if They Don't Get Back on the Job—Some May Lose Their Jobs Even.

## KEEP IN STEP GET IN LINE

Elderly Folks and Folks With Health Broken Down Find Tanlac Fine Tonic.

**OLD VETERAN PRAISES IT.**

Did you ever feel good for nothing, tired even before you started to work, and before you had walked a half-dozen blocks get all out of wind? Maybe, between you and I, the boss thinks that is what ails you now. A certain pretty well-known man here in Richmond said some several days ago: "I was feeling tough, was all run-down and needed a tonic up of the system. I felt good for nothing, and life was a drag. I was tired before the day's work began, and before I walked a few blocks I would get all out of wind. I read a lot about Tanlac and what it was doing for others, but hesitated quite awhile before taking it. When I did I felt better almost from the start. I had not finished one bottle of this great tonic before I noticed an improvement, and now that I am on my third bottle I feel strong, and I must admit Tanlac has done me more good than any medicine I ever took. Tanlac is the greatest system builder and strengthener I have ever used, and will do so, and is advertised to do. I can cheerfully recommend Tanlac as a great tonic." Signed: E. Scott Gibbs, 1315 Perry Street, Richmond, for thirty-five years a machinist with the Southern Railway, and a well-known Confederate veteran.

We're mighty proud of what people say about Tanlac. The above statement from one of Richmond's best men, a gentleman of the old school, you know his testimonial has weight.

Elderly folks, passing along the years, find in Tanlac a strengthener and tonic that makes the years and helps the faltering system keep step. Are you in step? Don't fall out. Get in line.

I wish I could send you folks who simply won't believe what I'm telling you. These are facts, folks. Read them carefully—then get Tanlac.
